

Minnesota

Minimum distance to any COVID-19 testing center or federally qualified health center

Distance
(miles)

Each hexagon is approximately 0.5 sq. miles. Distance is calculated by finding the shortest network distance between a random point within a hexagon and any testing center or federally qualified health center. Route data via (c) Project OSRM contributors and (c) OpenStreetMap contributors, ODbL 1.0. 2020-07-15, Liz Roten (Metropolitan Council)
